

RAINER GIEVERS GMBH & CO. KG

Height Adjuster Screws (large foot plate)

The foot plates of these adjustment screws have a diameter of 45, 60 or 80 mm to minimize the surface pressure.

With the hexagon on the top of the plate heavy weights are easy to adjust by spanner.

There is a cross slot on the bottom for quick assembly.

For diameters 45 and 60 mm cover caps in various colors are available.

Foot plates are combinable with all other adjusting spindles.

CONFIGURE YOUR HEIGHT ADJUSTER

1. Choose your thread diameter
2. Specify thread length and height of thread
3. Choose your adjustment options
 - internal hexagon or slot on bottom
 - double flat, square or hexagon on bottom
4. Choose foot plate
5. Choose riveting:
 - rotatable
 - solid
 - rotatable with crosstip
 - solid with crosstip
